

Please do not approve the NAB's petition 04-160. My area of texas, (McAllen, Mission, Edinburg) is one of the fastest growing areas in the nation! Yet, we DO NOT have a comprehensive radio market! We do not have access to traffic or weather reports. The best we get is a DJ saying, "A listener just called in and there has been a wreck on expressway 83 near McAllen. You might want to avoid that area..." BIG DEAL! Satellite radio, in particular XM, has been a godsend to those of us stuck in radio hell. Despite our growth, our radio market is going backwards - Satellite radio is the future and it is a service I GLADLY pay for. Please allow it to continue to improve the lives of millions of Americans with it's quality & comprehensive programming!
